**ALD-CHR-235PSO**  
 Left Hand Operated  
 Old

Updated Product  
**ALD-CHR-235NPSO**  
 Left Hand Operated

Chrome plated Cartridge Sleeve now added to the exposed part kit

### BENEFITS OF MODIFICATIONS

*"Chrome Part from the Concealed Body is now removed and added to the exposed part kit".*

- This change has been made, to give our customers the liberty to select their choice of colour for the exposed part kit at the time of finishing stage from our colour finish spectrum.
- Now, since there is no chrome Plate Cartridge Sleeve attached to the concealed part, the customer is not bound to select 'only chrome' as an exposed part at the later stage.
- If the colour required by customer is not available, Dealer can provide him concealed body so that his plumbing work will not be affected and place the order for his preferred colour. This gives a lot of time and flexibility to the dealer to place the orders as per his customer/ project requirements.
- While renovating a bathroom if the fitting colour needs to be changed then one has to only change the exposed part. During the process no plumbing work will be required as the internal concealed part remains the same.
- This will definitely result in better inventory management at dealer and Plant level and reduce our demand supply gap to a large extent in the near future.

Please note that the updated product code is identified with the suffix 'N'.
